

Change Sheet for the Dingell Manager's Amendment

The Dingell manager's amendment makes three key changes to H.R. 5613 as approved by the Subcommittee:

1. The manager's amendment provides the Secretary of Health and Human Services flexibility to work with the States and properly implement the phase-in of the electronic asset verification system that determines Medicaid eligibility for applicants and beneficiaries.
2. The manager's amendment adds additional subjects to the independent study in Section 4 of the committee print. That study will examine problems identified by the regulators. The study will also include a review of the system States use to report Medicaid claims, the Medicaid Management Information System, and recommendations for improving the accuracy and completeness of claims submitted.
3. The manager's amendment clarifies language in the provision for electronic asset verification of Medicaid applicants and beneficiaries to ensure that fraud and abuse safeguards are followed in the contracting process.
